

FIG Working Week 2027
Stavanger Norway 23-27 May

The Power of Where for the New Generations

**Geomatikk
dagene**
THE NATIONAL GEOSPATIAL CONFERENCE

CALL FOR ABSTRACTS

Geomatikkdagene + FIG Working Week 2027

Next year, we are creating a unique arena in Stavanger, for knowledge sharing, professional development and new perspectives.

Submit your abstract, and join us as the global surveying and geospatial community

SUBMISSION DEADLINE: 1. NOVEMBER

Join the global surveying and
geospatial community in
Stavanger next year

GeoForum
Organisasjon for geomatikk

Call for abstracts is now announced.

Geomatikkdagene will have two dedicated tracks each day during FIG Working Week. One will be in Norwegian/Scandinavian languages, while the other will be open to presentations in English. If you are able to give your presentation in English, we encourage you to do so – allowing your experience and knowledge to reach a wider international audience.

We are particularly interested in contributions that demonstrate how geospatial data and geomatics can help create smarter, safer and more sustainable societies.

We are looking for contributions that are:

- professionally relevant and timely
- inspiring and educational
- based on research, development or practical experience
- relevant to a Norwegian and/or international audience

Topics may include:

- AI, automation and GeoAI
- Digital twins, 3D and Smart Cities
- Emergency preparedness, societal security and critical infrastructure
- Climate, nature and sustainable land management
- Ocean, coast, the Arctic and marine data
- Geodesy, positioning and resilient digital infrastructure
- Property, planning, registers and data quality
- Infrastructure above and below ground
- Nordic cooperation and innovative public services
- Education, skills and the next generation

The list is not exhaustive. If you have something you believe the professional community should hear about, we would like to hear from you.

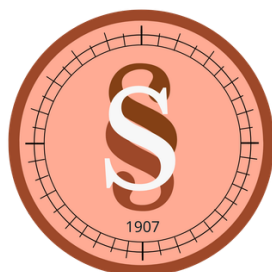

Do you have a project, an idea, a case or an innovation worth sharing?

Submit your abstract by **1 November** and become part of the programme at Geomatikkdagene + FIG Working Week 2027.

You can submit a proposal to Geomatikkdagene and/or FIG. If you would like your contribution to be considered for the Geomatikkdagene programme, please submit it via the link on geomatikkdagene.no. If you are interested in FIG and would like to be considered for one of the sessions organised by FIG's commissions, please submit your proposal through the FIG Working Week 2027 website.

For practical information and the submission form, please visit geomatikkdagene.no. Registration fees for speakers in the Geomatikkdagene sessions will follow the same guidelines as FIG.

If your presentation is selected for the programme, please make sure to register within the applicable registration deadlines, which are shared by FIG Working Week and Geomatikkdagene.

Programme Committee

Erik Landsnes, Sogelink and Board Representative
